NEHA RAJ

QA Engineer

Bengaluru, India | +91 8197790518 | neharajsbnn@gmail.com

PROFESSIONAL SUMMARY

Guided Learning Testing Specialist with 3 years of experience at Oracle in enterprise application testing, Oracle Fusion workflows, and release validation. Designed and executed 100+ test cases across functional, integration, and regression testing. Experience executing existing Playwright tests and validating results within an AI-assisted Oracle Guided Learning testing project.

TECHNICAL SKILLS

Testing: Functional, integration, regression, system, smoke, UAT, test plans, test cases, SDLC, STLC

Automation and tools: Playwright test execution, Selenium WebDriver locators, Postman API testing, Jira, Git

Programming and databases: TypeScript, Java, Python, SQL (joins, subqueries), HTML, CSS, Flask

Domains and methods: Oracle Guided Learning, Oracle Fusion (HCM, ERP, Procurement, Recruiting), Agile/Scrum

AI skills: Generative AI and prompt engineering concepts, AI agent workflows, output validation, responsible AI principles

PROFESSIONAL EXPERIENCE

Oracle Jan 2024 - Present

Guided Learning Testing Specialist Bengaluru, India

- Designed and executed 100+ test cases covering functional, integration, and regression testing to support Agile sprint testing and release validation.
- Tested Oracle Fusion business workflows across HCM, ERP, Procurement, and Recruiting; tracked defects in Jira and collaborated on their resolution.
- Performed upgrade testing and validation and supported production deployments across multiple environments.
- Designed and delivered interactive OGL content, onboarding journeys, and product demonstrations for Oracle AI Chat, APEX, CPQ, WACS, and OFS.

Key Project | AI Agent Bot for Automated OGL Testing

Oracle team project using Playwright and TypeScript for AI-assisted OGL guide testing, failure detection, and guide and bot repair workflows.

- Execute existing Playwright tests and validate OGL guide steps, element targeting, and user journeys against expected Oracle Fusion application behaviour.
- Project workflow combines spreadsheet-defined guide steps, browser and screenshot observations, and JSON/CSV reports to support issue identification and review.

ITC Ltd, Indian Tobacco Division Feb 2023 - Mar 2023

Software Developer Intern

- Developed a Python Flask user access automation tool, reducing manual processing time from 2 days to 2 hours.
- Integrated automated email notifications to support request tracking.

ADDITIONAL PROJECTS

ShopperStack E-commerce Testing: Performed UI and functional testing across 50+ user workflows.

Leaf Disease Detection: Developed a TensorFlow/Keras CNN model achieving 92% accuracy in plant disease classification.

EDUCATION

B.Tech in Computer Science Engineering 2019 - 2023

M.S. Ramaiah University of Applied Sciences | CGPA: 8.8/10

CERTIFICATIONS

Oracle Guided Learning Platform Certification; Oracle AI Foundations Associate; Oracle Cloud Infrastructure AI Certified Foundations
